Code Validation

- Coded pages must pass the HTML validator.
- Coded pages must pass the Axe validator. Some exceptions include if there is text on gradients.

BEGINNING
= More than 4 Errors

DEVELOPING
= 3-4 Errors

ACCOMPLISHED
= 1-2 Errors

EXCEPTIONAL
= No Errors

Anything else I should know?

Type any notes or other items you would like the instructor to know or consider here. You may leave blank if not necessary.

I initiallly ran my code through the validators and forgot to before I submitted. I have some unclosed tags. I also moved headings outside of articles to accomodate styling and in retrospect should have done that differently.
